REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-9 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 1-7, the prior art of record does not teach transmitting a third packet on the transmission channel to the transceiver, estimating the transmission channel to the transceiver from the calibration factors and a second measurement of the transmission channel from the transceiver. As to 8, the prior art of record does not teach (c) wherein the master transmits to the slave using updated estimates for the communication channel when the communication channel measured from transmission received from the slave shows a change in the communication channel, the updated estimates calculated from (i) measurements of the communication channel for transmission received from the slave together with (ii) calibration factors from prior measurements of the communication channel by the slave and by the master where the prior measurements are periodically performed. As to claim 9, the prior art of record does not teach wherein the channel estimator estimates the channel to the transceiver from measurements of the channel from the transceiver together with calibration factor from channel information received from the transceiver. Any comments considered necessary by applicant must be
